TRICERATOPS

ANSWER SHEET

1. The Triceratops was a herbivore, meaning it ate plants.
2. The Triceratops had three sharp horns.
3. The frill may have been used for protection, attracting mates, or communication.
4. The Triceratops was about 8 meters long and 3 meters tall, as long as a bus and as tall as a giraffe.
5. It weighed up to 12 tons, about the same as 12 stacked cars!
6. The Triceratops ate plants like ferns and shrubs, using its beak and tough teeth to chew them.
7. It lived in North America around 68 million years ago, in forests and open fields.
8. The Triceratops used its strong horns and frill to scare off or fight predators like the T. Rex.
9. A massive asteroid hit the Earth, causing climate changes and leading to the extinction of dinosaurs.
10. The Triceratops was a social dinosaur and may have used its frill's colors to communicate!
